Application: Application: Application:
Ford Contour / Mercury Mystique / Mercury Cougar

Location of cabin filter:
In front of the windshield under the vent grille
on the passenger side of the vehicle.

Notes:
Standard and Philips Screwdriver: Torx T20

To remove existing filter:

1. Turn of power windows with the wipers in the vertical position. (Fig. 1)
2. With the hood closed, use a flat blade screwdriver to pry off all the two plastic caps (part # H001) covering the screws securing the passenger side vent grille. (Fig. 2)
3. Using a Philips head screw driver, remove the two screws (part # H002) securing the passenger side vent grille. (Fig. 3)
4. Open hood. Carefully pull back the weather strip from the passenger side vent grille. (Fig. 4)
5. Using a Torx driver, remove the two Torx head screws (part # H003) that secure the bottom portion of the vent grille. (Fig. 5)
6. Carefully remove the vent grille. To make this step easier, remove the plastic cap and screw securing the center portion of the driver side vent grille. (Fig. 6)
7. Loosening the two clips that secure the filter housing from both sides of the housing. (Fig. 7)
8. Slide out the filter and the housing. (Fig. 8 & 9)
9. Install new filter and housing. (Fig. 10)
10. Remove steps 1-7 to complete installation.
